Dear Mr. Howell:

This is to advise you that the Bay Area Air Quality Management District is issuing a minor revision to the Major Facility Review Permit for Criterion Catalyst & Technologies Company L.P. (Facility Number A0227).

The facility has requested the following modification:

- A correction to the capacity of S-321, Silo. The standard capacity for this type of source is the volume, not the operating rate. This change will not increase the annual material throughput and annual emissions, since the throughput is limited by Condition 13092, part 2.

The District has also made the following correction:

- Sections III, IV, and XII now state that the State Implementation Plan (SIP) rules are available on EPA Region IX's website.

No comments were received from EPA.

A copy of the final Major Facility Review Permit is enclosed for your information. If you have any questions on this matter, please call **Dharam Singh, Air Quality Engineer II, at (415) 749-4714.**

Very truly yours,

William C. Norton  
Executive Officer/  
Air Pollution Control Officer
